

FOURTIERS

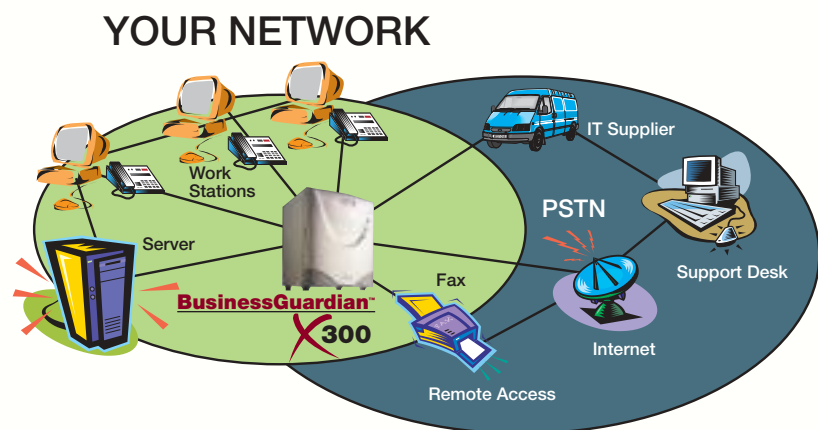

product overview

The Fourtiers solution using BusinessGuardian X300 provides the small office with a comprehensive and fully integrated communications solution to manage needs.

A standalone unit that delivers advanced telephony and data features, BusinessGuardian X300 enables the business to integrate ALL of their communication links - voice and data - into a single platform. This one gateway, combined with the Full Fourtiers solution, provides a comprehensive, integrated communications and information technology solution that is highly reliable, user-friendly, cost-effective, and easily managed.

Our team of networking specialists and Microsoft Professionals are ready to supply solutions tailored to your company needs. With access to the latest networking hardware, software and strategic partnerships we can supply state of the art technologies. You can be assured that the solutions provided will be 'leading edge' and 'future proof' allowing your communication infrastructure to grow with your business.

- **TIER ONE**
Physical Structured Cabling
- **TIER TWO**
Network Equipment Supplies
- **TIER THREE**
Data Routing including DSL, ISP and Remote Access
- **TIER FOUR**
Applications, Voice mail, CTI and Fax Server

Fourtiers services for all your **business IT requirements**

1 TIER ONE - Structured Cabling / PC Server Hardware

Whether it is moving into new premises or expanding an existing office, distribution of voice and data to desktops requires careful planning in order to optimise the office space and ensure that the business is fully operational in the shortest period of time. Our experienced structured cabling team will assist with office planning and ensure expedient distribution of services allowing your company to continue business with minimal disruption.

2 TIER TWO - Network Equipment

With the ever increasing availability of different networking equipment The FOURTIERS' portfolio includes LAN Switches and Hubs from all the leading manufacturers at prices to suit your individual IT Budgets. FOURTIERS consultants can advise on the network equipment that best suits your business needs.

3 TIER THREE - Internet Connectivity (ADSL, Voice, etc.)

No business is complete without Internet access and e-mail. The FOURTIERS' portfolio includes data routing equipment from leading manufacturers. Using our experienced networking and remote access consultants, you can be assured that the solution provided will be of the latest technologies available and able to grow with your business.

4 TIER FOUR - Software, Applications and Web Hosting

Off the shelf or tailored to your business, FOURTIERS can supply applications that will ensure your companies IT efficiency. We are aware that IT investments must pay for themselves therefore our consultants will ensure that the right applications are designed to enhance your business practices.

Q:

Do you require technical support, Day consultancy or Full project based solutions?

A:

FOURTIERS can help, no job too small (min half day charge applies). Preliminary audit of any sized project including draft quote presented in a staged shopping list format, allowing you to choose which solution you require. Upon acceptance of the final quote full project planning, documentation and solution will be instigated and completed within agreed time scales.

- Full range of consultancy and solutions
- Remote server / desktop administration and management via secure VPN tunnel, tailored to each individual business need to provide a complete managed solution.
- Intranet or Internet based Web site design from producing solutions ready for publishing with current ISP to building fully functional web servers hosted in house.

networks

Q: Have you outgrown your existing infrastructure, need to update/increase the number of existing nodes or have a requirement for local area networking?

A: Structured Category 5 Flood cabling, patch panel to floor ports allowing upto 100mbps Ethernet connectivity.

Q: Require multiple site connectivity or remote access without the cost of leased lines between sites?

A: Make the most of the Internet backbone, using Virtual Private Networks you can achieve a secure, low cost solution either by dialup or DSL "broadband".

Q: Have you a need for remote teleworker's or need access to your data from anywhere in the world?

A: Microsoft Terminal Server has the answer, 128 bit encrypted and optimised for a 28.8 modem connection you can access everything you can in the office from anywhere in the world.

■ **Internet connectivity using dialup, dial on demand or DSL "Broadband".**

■ **VPN technologies from hardware or software solutions.**

- Rack mounted or stand alone server installation with UPS
- Preventive Maintenance cover available on existing and new.
- PC and Server configuration / installation, Raid 5 server solutions for data and OS fault tolerance.
- Peripherals, hubs switches and routers.
- Backup devices to suit company's needs from one touch disaster recovery mechanisms to OS driven restoration.
